EDUCATION

Loughborough University
BSc Banking, Finance and Management
Loughborough Employability Award (scholarship)

A levels · A*BB

In a lean, fast-moving scale-up I wear three hats at once: I **shape the big strategy pieces with the C-suite**, **own the commercials of our largest account**, and **lead its delivery**, managing development teams to meet client needs while owning the C-suite client relationship.

EXPERIENCE

NEOBRIDGE — Senior Consultant — 2023 – present

- **Partnered with the CEO and Head of Sales** to design the company's commercial operating system: ten leadership decision workshops, a 13-stage pipeline (1,115 deals migrated) and a cadence up to a leadership review I run. Conversion up **~15%**.
- Led a **board-level developer-ecosystem programme as the CTO's proxy**: four-phase framework, 10–11 tool categories benchmarked, roadmap funded by the board. Developer base up by a **double-digit percentage**.
- **Originated a revenue-share joint venture** with our largest client and ran the decision process for both leadership teams: eight workshops, three structures modelled with finance (base, upside, downside) and the executive decision memo. **Signed**, with safeguards.
- Owned the commercials on our **largest client account**, growing it from a **€40K proof of concept to €3.4M booked** (~5x in a year): built the 12–18 month account plan, priced from delivery economics and ran governance with the client's CTO and Chief Commercial Officer.
- **Aligned the CPO, Head of Sales and product leads** on one go-to-market plan for three stalled enterprise products: 15+ sales assets, **two new clients** and six-figure revenue, including the €40K deal that became our largest account.
- Led a **~€1M greenfield loyalty platform** from discovery to live as accountable delivery lead, running product, engineering and design teams through agile delivery. Launched **on time and on budget** to **10,000+ users** across five brands.
- Originated and scoped a **~€2M greenfield affiliate-marketing platform** after spotting a larger problem in the client's affiliate programme. Ran payment, compliance and entity-structure workshops and led the cross-functional build across **15+ people**; live across three brands in October 2026.

CAPGEMINI INVENT — Consultant — 2022 – 2023

- Built the **end-to-end change strategy for a department-wide ServiceNow rollout** at the Government Digital Service (**1,000+ staff**), leading analysts on training, organisational and behavioural change (Prosci ADKAR).
- Co-founded the firm's **first Web3 and NFT consulting team**: first UK team to win C-suite funding for its NFT strategy work, and secured a strategic partnership.
- Led business change on a national utility's **multi-million-pound** digital transformation, managing a team across three workstreams.

NORTH HIGHLAND — Analyst — 2021 – 2022

- Facilitated customer-journey workshops with **global clinical leads** to shape a **multi-million-pound** pharma digital transformation.
- Drove adoption on a **multibillion-dollar** pharma transition through adoption analysis and building ambassador networks.
- Cleansed **10+ data entities** and built **three visualisation tools** for a multinational telecom's HR division.
- Contributed to the firm's social mobility working group.

KLAVIYO — Sales Development Representative — Nov 2020 – Mar 2021

- Achieved **109% of target** at a SaaS start-up that later went public.
